

TechCrete™

The Flexible Solution for Concrete Repair

TechCrete™ by Crafco is the flexible solution for concrete repair. TechCrete bears weight but remains flexible, so it won't crack the surrounding pavement. This proprietary blend of polymer-modified resin, oils, and high-quality aggregate has a unique gray color to blend in with concrete, where it can repair corner breaks, joint deficiencies, utility cuts and more. TechCrete is easy to install and can be opened to traffic as soon as it cools – usually within an hour.

BENEFITS

Reopen roads within hours instead of days

Supports heavy loads but remains flexible

Gray color for inconspicuous repairs

Strength, Flexibility, and Lasting Performance.

FOR REPAIR IN A LARGE VARIETY OF PAVEMENT DISTRESSES

Cracking (Corner breaks, longitudinal and transverse cracking)

Joint deficiencies (Spalling of longitudinal and transverse joints)

Surface defects (Map cracking and scaling, pop-outs)

Miscellaneous deterioration (Blowups, faulting of transverse joints and cracks, lane-to-shoulder dropoff, lane-to-shoulder separation, and patch/patch deterioration)

Bridge deck potholes and surface spalling

KEY BENEFITS

- Resists cracking, delamination and spalling
- Flexible, strong and moves with the pavement as it expands and contracts
- Supports heavy loads due to high compression resistance
- Long-lasting repair with proven service greater than 10 years
- Improves ride quality
- Provides a high friction surface to ensure driver safety
- Easily installed and generally is opened to traffic within an hour
- Waterproofs PCC pavement and resists commonly used chemicals that destroy pavement
- Consistent performance and ease of use with our precision premeasured mixture conveniently packaged in meltable bags.
